

February 2018

What two keys can't open any door? (See answer at the end of the article.)

I was recently asking myself, would I have liked to be a meteorologist during the past several months? What unbelievable weather changes we have experienced in Texas. After my year as president, I'm looking forward to being able to say, "What unbelievable positive changes we have made in the Texas Section thanks to everyone's involvement."

The future – what will it unveil for our industry? Who will be leading the charge? Are you seeking interns and future hires? The annual Student Symposium is just around the corner in College Station on April 11-14. This is a fantastic opportunity to interface with the future leadership of our industry. The Symposium is built to give professionals many occasions to meet and spend time with more than 400 students from numerous universities across Texas and Mexico. I want to inspire your firm to get involved with the career fair, sponsorship, and professional development available at the event. [Click here](#) to visit the Symposium website or contact the Texas Section office for further details.

I am reaching out to all ASCE members, Civil Engineering Professionals, Public Agencies, and the Construction Industry for your support at the Student Symposium. Engage with the students to look through the eyes of the future.

Answer: Monkey and Donkey. Don't be like the monkey and donkey who can't open any doors. Be the key that opens the door to the future for our students and unveils the destiny of the civil engineered world of tomorrow.

Until the next issue – [It will be FUN!!!](#)

Sincerely,

Lawrence D. Goldberg, PE

ASCE TS President 2017-2018
