

## ASCE Region 6 Symposium Mystery Design Rules 2024

The purpose of this competition is to combine design skills and creativity to form a solution to a civil design scenario.

### Participation

A team must consist of students from a university in good standing with the ASCE Region 6. All team members must be registered attendees of the symposium for any and all days on which the Mystery Design Competition will take place.

The number of team members is at least 3 and up to 5 people. There shall be a limit of one solution per team and one team per university.

All team names must include the university name. For this competition, abbreviated school names are acceptable so long as they are generally understood representations of the represented university.

The detailed rule will be provided at the competition start time on the day of the competition. Failure to follow the provided rules will result in an automatic disqualification.
